

Electronics II

Exercise 13

Hard Deadline Thu 26.04.2018

1. Create your own IoT design! (12p)
 - You are to present your setup in mandatory exercise session on 26.04. where it is rated by our lecturer based on its **coolness**. You must present a working live demo.
 - Previous week's Blynk example should get you going but you are welcome to use any approach you want. Just keep in mind that it has to be *Internet* of things. If you feel unsure if your idea is suitable come discuss with us. Next week's exercise session (18.04.) will be used to help you build and debug your setup. (There also going to be help session on last weeks Monday/Tuesday but not Wednesday)
 - Exact time and place of the final session as well as further details will be provided later. If you already know that you won't be able to attend please let us know.
